Press Release

ChemSpec Canada announces new partnership with Cimbar Performance Minerals

March 2025

Ontario, CA – Effective immediately, ChemSpec Canada, a subsidiary of Safic-Alcan and a leading supplier of specialty chemicals, is excited to announce a new partnership with Cimbar Performance Minerals.

Cimbar has more than 100 years of experience with multiple talc production and mining sites in the United States, China, Mexico, and Pakistan. They offer some of the purest high-lamellarity talc in the world. The Cimbar talc portfolio offers a broad line of high-bright products engineered to enhance the performance, appearance, processing, and functionality in a range of product markets including industrial, automotive, and consumer-based applications.

David Jackson, Managing Director at ChemSpec Canada stated: “CIMBAR Performance Minerals talc is a great addition to our performance additives range for the Canadian market. Cimbar talc will further expand our portfolio offering to many important industrial applications in the Canadian market including paints, coatings, plastics and rubber.”

About ChemSpec

ChemSpec is a North American specialty chemical distribution firm, working within the industrial polymer compounding market and the cosmetic ingredients industry. ChemSpec is a subsidiary of Paris-based Safic-Alcan Group, an international specialty chemical distribution company, focusing on both industrial and life science chemistry.
